

# EliteID

## CLOUD ID BADGE PRODUCTION

Create and print ID badges from any internet connected computer or mobile device. No onsite server or database required.

*See reverse for a feature chart to help choose your subscription tier.*

### Enrollment is as Easy as 1-2-3

The guided enrollment workflow ensures the required information and ID photo are collected before the ID is printed.

### Cross-Platform Integration

EliteID is versatile and open for integration with many transaction systems and hardware configurations.

### Advanced Card Encoding

ISO generation, magstripe encoding and smartcard support are included with EliteID+.

### Photo Capture Options

From Canon camera support to webcams or any mobile device ID photos are captured quickly and easily.

### Fully Scalable

EliteID is fully scalable for any organization. Each subscription comes with unlimited cardholder records and card designs.

### API Connections

Modify records individually or in bulk with our APIs both RESTful and Webhooks available for real time synchronization.

### RemotePhoto Integration Available

Online photo submission can be seamlessly managed from one location within EliteID.

### EliteID Subscriptions

EliteID is an annual subscription service based on the number of users concurrently using the application. Choose between EliteID and EliteID+.

| FEATURES                               | EliteID | EliteID+ |
