pronto100

The smallest, fastest, best quality ID card printer in its class.

MAGiCARD

pronto100

Introducing the Magicard Pronto100

Do not underestimate its tiny frame. Designed from the ground up to be best in class: the powerful Pronto100 packs a mighty punch. With a focus on high speed, the highest quality and with the environment a key factor in every aspect of its design and manufacture, the Pronto100 has been developed to exceed the expectations of today's tech-savvy and connected consumer.

Bundled "MagiCard Design & Print" software enables users to produce pin-sharp cards every time, while the power of Magicard's Clix user interface lets users, wherever they are, operate the Pronto100 over company intranets.

The result? A 21st century printer that incorporates Magicard's decades of card printer experience at a price point appealing to all sectors and which is made to last in Great Britain.

Small footprint – Small but mighty, the Pronto100 proves that the best things come in small packages. With its small footprint and light weight, the Pronto100 will fit into offices large or small while also being ideal for the home worker.

High speed – Quick to set up, quick to operate and quick to deliver the best results. The Pronto100 offers the highest print speed in Magicard's smallest printer package available today.

- HD photo quality - 23 seconds per card
- Standard colour - 18 seconds per card
- Monochrome - 4.7 seconds per card

Quality – The Pronto100 packs a mighty punch delivering HD photo quality printing out of the box. Delivering photo-realistic colour reproduction, and with top-quality edge-to-edge printing guaranteed, your printed cards will never look so good.

Built-in simplicity – Despite its advanced features, the Pronto100 is no prima donna. Like all Magicard products, the Pronto100 has been designed to be low maintenance and has been built with the best quality materials in a world-class manufacturing facility. The Pronto100 will therefore require only limited support: users do not need a doctorate to use this printer.

Printer features

Standard

- Optimised colour profiles
- Visual Security HoloKote®
- High speed print
- 3 Years Limited warranty
- 50 Card input hopper
- clix Remote management
- Edge to edge
- Digital shredding
- Small footprint
- Ethernet

Optional

- Visual Security HoloPatch®

Remote management & control

clix Remote management

The Pronto100 uses the latest version of Magicard's Clix remote user interface, giving users remote control of the device to manage all aspects of printer set-up, maintenance, diagnostics and operation.

The simplest 'plug and play' set on the market combined with easy control of device settings, it helps with the management of supplies and enables proactive ordering mechanisms to be established.

Clix allows for remote monitoring of activity and the status of the printer and its consumables from any web-enabled device on the same network.

Security built in

Digital shredding

Digital shredding™ - Like its bigger stablemates, the Magicard 300 and 600, the Pronto100 is equipped with Magicard's 'Digital Shredding' function which renders data sent to the printer unreadable after use – contributing to users' data security and enhancing compliance with GDPR.

VISUAL SECURITY HoloKote®

Anti-fraud - The Pronto100 comes with 3 standard HoloKote® designs, Magicard's patented HoloKote® security watermark which can be printed across the card surface. When used with HoloPatch® cards, one area of the HoloKote® watermark can be highlighted as a high visibility security seal.

Commitment to the environment

Whether through carbon offset or actively seeking to reduce the individual footprint of devices, Magicard's approach is driven by recognition of the importance of environmental issues to consumers worldwide.

The Pronto100 marks the start of Magicard's move towards devices which have a high level of designed-in recyclability. All future devices will be built with this in mind.

The Pronto100 is manufactured and packaged from over 75% recycled or recyclable material.

Magicard's support of One Tree Planted sees the company plant a tree for every printer sold.

Since entering the scheme, Magicard has planted 30,000 trees resulting in a potential CO^2 offset of 660 tonnes p.a. This equates to the annual mileage of 150 cars or every journey undertaken by Magicard's global workforce for both personal and professional purposes and a significant proportion of our ground transportation for products worldwide.

ONE TREE PLANTED
