

ID CORE 2.0

ID Credential Software

The ID Core 2.0 Credential Software from IdentiSys is the latest in secure ID card design and production. ID Core 2.0 has editions available that take you from a basic entry level to an enterprise solution that offers unparalleled features — CS-102, CS-202, CS-302, and CS-402. This versatile software suite can be catered to any market and application.

ID Core 2.0 is a complete overhaul over the original ID Core software. This software is compatible with most ID card printers from various manufacturers.

ID Core 2.0 Editions

- CS-102 is the entry level package with basic features for card design, printing, editing and database capabilities.
- CS-202 includes CS-102, with additional advanced database options and production management features.
- CS-302 includes CS-202, but adds proximity and smart card encoding features, as well as fingerprint capture and storage. A network version of CS-302 is available that adds network capabilities for a centralized application management and sharing data between users.
- CS-402 has all the software features of CS-302, but has Active Directory Read and Write, as well as advanced MIFARE® DESFire EV1 and MIFARE® SAM AV2 encoding. Like the CS-302, a network version of CS-402 is available that adds network capabilities for a centralized application management and sharing data between users.

ID Core 2.0 is perfect for photo ID cards, ID badges, loyalty/membership ID cards, gift cards, and much more.

ID Core 2.0

ID Core 2.0 comes in 4 editions: CS-102, CS-202, CS-302, and CS-402. All editions support local license activation; however, our CS-302 and CS-402 editions can be purchased either as a local license or network licenses which support centralized data and license management.

Get started in just a few clicks with an easy-to-use wizard for card creation and database setup, you can get started in just a few clicks. With an advanced card designer, we give you all the tools you need to create the perfect card for you in a simple and fun way.

Features

Design and Customization

- Advanced design features in card designer with multiple card sizes
- Editable preloaded card samples
- Customize record fields (Picklist, required fields, date select, etc.)
- Customize application layout, move windows around
- Each card can have own settings (Database, camera, printer, etc.)

Network Licensing & Databases

- Concurrent users with network licensing (Small business server)
- Create database connect to internal view/query
- No mapping fields to database(s) = Connect & Go!
- Each card template can push/pull data to multiple databases
- Auto switch card layout based on field value
- Auto full record data with document scanner (OCR)

Printing & Encoding

- Enhanced printing and encoding capabilities
- Print farm setup with print dispatcher and print server editions
- Print to Windows™ printers
- Central and de-central printing capability
- Automatic printing and set printing requirements
- Contactless encoding, magnetic stripe, 1D & 2D barcode support

User Privileges

- User activity logging with storage item
- User guided setup wizard for cards, MIFARE© and databases
- Store template/image from ID or fingerprint scanner
- User profile login with permissions - Control what every user can do
- Activation does not require USB key
- Demo edition can be activated - no starting over
