

THE ULTIMATE CREDENTIAL PRODUCTION SOFTWARE

ABOUT ID CORE

ID Core is a powerful tool for your professional ID credential production. This user friendly software combines easy design features with print, database and advanced encoding capabilities in a full-feature software application. It is provided in 4 editions: CS-101, CS-201, CS-301 and CS-401 that integrate the needed features for your ID card production needs.

Create professional ID cards with top quality graphics and ready-to-use predefined templates including backgrounds, clipart, shapes and design tools like Image Editor.

IDEAL FOR:

- Education
 - Student & Staff IDs
- Corporate
 - Employee & Visitor IDs
- Government
 - Military ID, Drivers License, & National ID
- Healthcare
 - Patient & Staff IDs
- Gaming & Hospitality
 - Loyalty programs & Staff IDs
- And more...

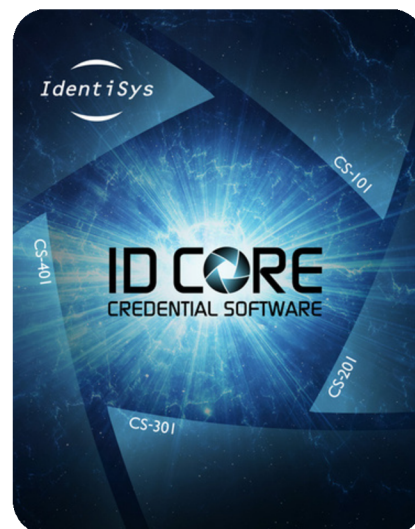

ID Core Credential Software is available in 4 editions:

CS-101 is the entry level package with basic features for card design and printing. Providing predefined templates, signature acquisition, edit view for text data input, database view, barcodes, and magnetic encoding support; this version is meant to get your system up and operating.

CS-201 includes CS-101 with packages for local MS Access and SQLite connection, database photo storage, face crop tool for recognition, and 2D barcodes.

CS-301 adds ODBC connectivity, RFID contactless direct encoding, smartcard direct encoding, smartcard plugin, internal and external RFID encoder support, fingerprint acquisition, multi-layout card designs, auto-print, conditional printing and operation logs.

CS-401 offers the same solutions as CS-301 with added support for features like DESFIRE, Web Print Server and Net License up to 16 PCs.

Features:

- Card templates
- Template browser
- Complete toolbox
- Clipart & shapes
- Image acquisition DirectShow, WIA, TWAIN and Camera SDK
- Barcodes and QR Codes
- Magnetic stripe encoding
- Signature and fingerprint
- Text edit in card design
